WINTER

What's happening

- **We want to welcome everyone back for the new year! Happy 2020!**
- As we embark on a new year of learning we will continue to enhance our reading, writing, and math skills through consistent practice.
- In math we will be working on place value and solving word problems using a variety of methods and skills.
- In reading we will continue practicing our phonics, sight words, and decoding skills. In addition to this, we will finetune our fluency and comprehension skill through the introduction of literacy circles and by participating in more rigorous tasks that will increase their academic performance.
- In science we will begin learning about the scientific method so that we can start creating our own science experiments!
